

New Engine for Towable Plaster/Mortar Mixers

Multiquip, the industry leader in plaster/mortar mixers is adding the **MPOWER 177F-BH, 9.0 horsepower engine** to its Essick and Whiteman towable mixer lines. The engine provides rental operators and contractors another choice at a time when supply-chain disruptions continue to impact new product delivery times.

We're confident the **MPOWER** engine meets or exceeds the performance requirements of our customers. Extensive engine testing – in addition to offering it in our Latin American markets for several years – has demonstrated a proven track record for reliability.

The engine is available with MQ Whiteman 6.3, 7.0 and 9.0 cubic foot mixers and MQ Essick 7.0 and 9.0 cubic foot mixers.

The MPOWER Mixer Lineup

Note: All models with MPOWER engines end in LF

MQ Whiteman

Tub Capacity/Construction

WM63SLF	6.3 CF/Steel
WM70SLF	7.0 CF/Steel
