

Air-Cooled Packaged Standby System

PSS8B PSS12H PSS20B

Conforms to UL STD 2200

Performance Data						
		LP			NG	
	kW	kVa	Amps	kW	kVa	Amps
PSS8B	8.4	8.4	35	7.6	7.6	32
PSS12H	12	12	50	10	10	41
PSS20B	17	17	71	15	15	62
Notes: (1) Derate 3.5% per 1,000 feet elevation above sea level.						

Features and Benefits

Manufacturer

- Winco has over 85 years of generator experience.
- Winco exclusively manufactures generators. We focus our resources on developing the highest quality products available at the best long term value.
- Manufactured in the USA.

Engines

- Commercial grade V-twin engines are standard in all models for smooth clean power.
- Pressurized lubrication system with spin-on oil filter.
- Generator exercises at operating speed to run complete diagnostics on the system.
- Converting between natural gas and LP gas is simple and easily done in the field.

Installation

- Generator design allows side wall or sub-base underground connections.
- Easy to use AC and DC terminal blocks make connections quick and simple.

Weather Enclosure

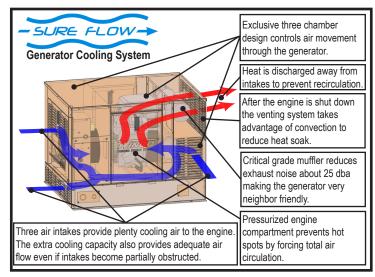

- Quiet neighbor-friendly operation.
- Fire-retardant sound absorbing foam.
- Galvaneal steel weatherproof housings are strong and durable at all temperatures.
- All panels are lockable and identically keyed.
- Side panels allow access to the generator for maintenance without having to remove or open the roof exposing the internal components to the elements.
- Unique three chamber housing design (see drawing to right) increases air flow while reducing noise and heat.
- Small compact designs are attractive and easily blend in with landscaping.

Additional Features

- Smart battery charger prevents sulfation increasing the reliability and service life of the battery.
- Fast automatic response to power outages with optional transfer switch restores power in less than 30 seconds.

Safety Features

- Safety shutdowns including high oil temp, low oil pressure, low frequency and low voltage protect the generator and load.
- Overcurrent protection by high quality thermal-magnetic Square D circuit breaker.
- Double disc fuel solenoids ensure positive fuel shut-off.
- Steel fuel inlet is more durable than aluminum preventing dangerous cracks.
- Full commercial warranty for 1 year or 1000 hours.
 Engine warranty administered by engine manufacturer.
- CSA approved and ETL listed to UL Standard 2200.
- All models are EPA/CARB compliant.

Specifications

Engine Specifications					
	PSS8B	PSS12H	PSS20B		
Make	B&S	Honda	B&S		
Model	Vanguard	GX690	Vanguard		
Displacement	570 cc/OHV	688 cc/OHV	993 cc/OHV		
Cylinders/Sleeves		V-Twin/Cast Iron	1		
Lubrication	Force	ed with Spin-On	Filter		
Ignition	Electronic				
Engine Speed	3600				
Governor	Mechanical				
Regulation	+/-1.8 hz Steady State

Air-Cooled Packaged Standby System

Control Options

Winco Air-Cooled Packaged Standby Systems are available with both 4-wire and 2-wire control modules. The choice of controllers give you the flexibility to effectively meet any application's requirements without compromise.

4-Wire Start Module

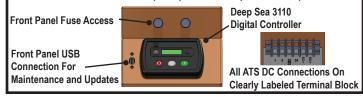

The Winco 4-wire control module is designed to work with the ASCO 165 4-wire transfer switches. All starting controls including start contacts, fuel solenoid contacts and time delays are built into the transfer switch. If a fault occurs, the transfer switch will shut down the system and display diagnostic code. This system is ideal for most residential standby installations.

ASCO 165 Automatic Transfer Switches

- Perfect for residential/light commercial applications.
- 3-second time delay prevents starting the generator for momentary power outages.
- 15-second delay before transferring to emergency power allows the generator to stabilize after starting.
- Electrical power is restored in less than 30 seconds.
- 5-minute time delay on retransfer allows the utility source to stabilize prior to transferring the load back to utility.
- 1-minute unloaded running time delay allows the engine and generator to cool down before shutdown.
- Available in 4-wire or 2-wire configurations.
- True double-throw contacts with inherent mechanical interlocking.
- Diagnostic indicators aid in troubleshooting.
- Listed to UL 1008

2-Wire Start Module

The Winco 2-wire control module starts the generator when a dry contact closes making it compatible with most transfer switches and other starting devices. All generator start and shutdown functions are controlled by the 2-wire control module. The module provides detailed operating and diagnostic information through its digital display. This module is recommended for applications with compatible transfer switches, solar, pump and independent operation.

Controller Features					
	4-Wire	2-Wire			
Fail To Start	Χ	Χ			
Fail To Stop	-	Χ			
Low Oil Pressure	X(1)	Χ			
High Engine Oil Temp.	X(1)	Χ			
Under Frequency/Speed	Χ	Χ			
Over Frequency/Speed	Χ	Χ			
Low Voltage	Χ	Χ			
High Voltage	Χ	Χ			
Battery Over/Under Voltage	-	Χ			
Digital Display (RPM, V, HZ, Bat. V)	-	Χ			
Notes: (1) Control displays a generic fault code.
