

The BPC-09 Combines Huth's & Ben Pearson's Strengths, Quality, Design & Features In One Package

The **BPC-09** is a manually operated bender using a knee control for bending and the Huth I-beam construction with the maintenance-free guide plate.

The BPC-09 is our new low-cost alternative for shops just starting up, adding exhaust service to their existing business, adding a second bender or replacing an old bender but still using the existing tooling.

- The sleek-designed main frame of the BP-08/BPC-09 provides maximum clearance for hard-to-bend pipes or when using bend data for a Ben Pearson bender
- Designed to accommodate Ben Pearson bending dies and end-finishing tooling
- Uses a double-ended cylinder for both solid and segmented end finishing
- Features Ben Pearson quick-disconnect endfinishing tooling
- Is powered by a hefty 5 horsepower motor
- Complete with tooling package
