

10" extension handle to give the user extra leverage on taller loads.

5/8" Aircraft hardened drive screw for strength in lifting.

Detachable battery pack makes swapping batteries simple.

Lectro-Truck nameplate means you get 35 years of product experience.

Adjustable strap bar allows user to adjust specifically to each load.

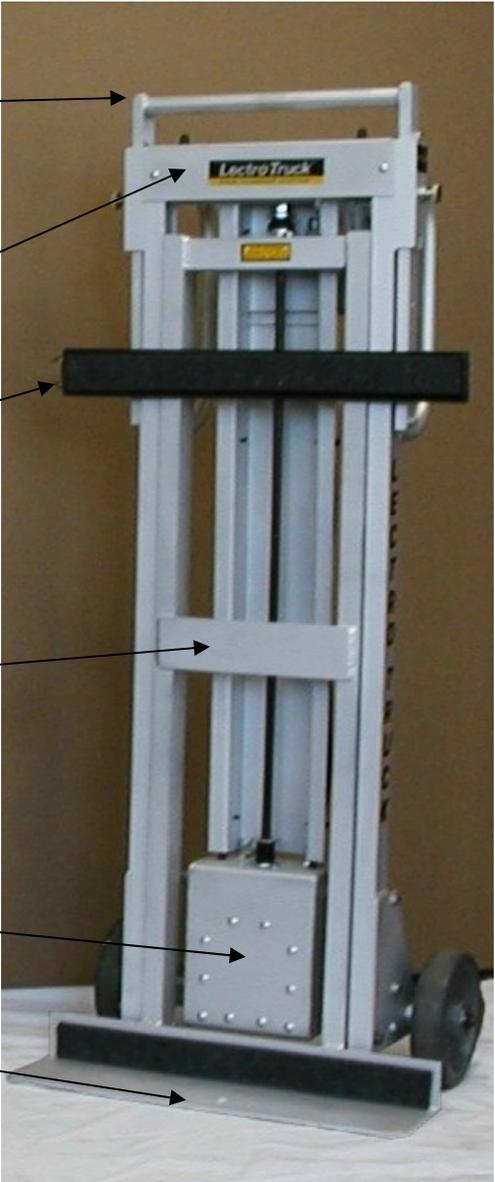

Shorter overall height makes this unit maneuverable in tight spots.

Heavy duty aluminum construction makes the unit light, yet durable.

Electric Brake stops the drive screw even at maximum capacity.

3/4 Horsepower motor is efficient, as well as powerful in lifting loads to 600 pounds.

24" Toe plate width to make moving in tight residential areas easier.
